In the early days of the Sony Alpha A7-series there was the A7, the A7R and the A7S.

Things were quite simple. The A7S was the one for video, the A7R was the high-resolution model and the A7 was the more affordable option. It was fairly easy to choose the right camera. The situation has got a bit more complicated since then.

Sony unleashed the Sony A7 and the A7R in October of 2013. With the Sony A7 aimed for general use sporting a 24 MP sensor and hybrid autofocus, the A7R differs primarily with its 36 MP sensor, therefore making the A7R more suitable for specific types of photography that need high resolution such as landscape, architecture, studio and product.
